

# DAILY TEMPERATURE VARIATIONS IN AN UNCONTROLLED GREENHOUSE OF THE DEPARTMENT OF BOTANY, NATIONAL TAIWAN UNIVERSITY\*

by

SU-HWA CHIANG

\* These data were based on the report of the Experimental Plant Ecology presented by the author to Prof. S. C. Lee. Maximum, minimum and noon temperatures of the greenhouse, and water temperature of an aquarium in the greenhouse were measured every day, except Sundays and vacation days from Dec. 1960 to Feb. 1961. The greenhouse was controlled only by opening and closing of windows. The ordinate is the temperature in degrees C.
