ABSTRACT: A lectotype is designated for *Senecio biligulatus* W. W. Sm. (Asteraceae).

KEY WORDS: Asteraceae, *Senecio biligulatus* W. W. Sm., Lectotypification.

INTRODUCTION

Senecio biligulatus was described by Smith (1911) on the basis of eight specimens and he stated in the protologue that types are at CAL and K. We studied all the specimens housed at CAL and digital image of specimens located at K and E. We found all of them are in accordance with the original description. All the specimens bear inscriptions made by Smith in his own handwriting, must be considered as syntype *vide Art.9.2* and are legally competent to ascertain as original materials *vide Art.9.2, Note 2* (McNeill et al., 2006). Thus, we choose well-preserved material located at CAL (Smith, 4245) as lectotype of *Senecio biligulatus*.

TYPIIFICATION

Senecio biligulatus W. W. Sm. in J. Proc. Asiat. Soc. Bengal 7: 69. 1911.

Lectotype (designated here): INDIA. Sikkim, Changu, 12,000 ft. dt.12-08-1910, *Smith 4245* (CAL!, K-iso!).

ACKNOWLEDGEMENTS

Authors are thankful to Dr. D. K. Singh, Director-in-Charge, Botanical Survey of India, Kolkata and Dr. P. Venu, Scientist 'F' & Head, Central National Herbarium, Howrah, India for kind help and support. We are thankful to Dr. V. P. Prasad, IBLO and Dr. S. K. Srivastava ex-IBLO, Royal Botanic Garden, Kew and the Curator, Royal Botanic Garden, Edinburgh for sending the images of specimens. We also acknowledge the Board of Trustees of the Royal Botanic Garden, Kew. Authors are also thankful to the anonymous reviewer.
