From the Editorial Office

Overall the publication process of the journal has been smooth and efficient over this year, with a total of 79 articles and 607 pages hitting a record high. The success of *Taiwania* is due to the efforts of the internationally diverse team of Associate Editors, Editors, reviewers, contributors and the supporting staff. Most of all, we would like to thank all of our contributing authors from more than 20 countries for their wonderful works and have chosen *Taiwania* as the journal they would like to publish in. We are also grateful to the more than 229 individual reviewers for their invaluable dedication and support over the last year.

With the success of the journal in terms of increasing impact factor and number of submissions to the journal, there came a challenge to take down the turnaround time and maintain the quality of the final published papers. There will be some changes to the editorial team over the forthcoming year. Drs. Lien-Siang Chou, Chiou-Rong Sheue and Wen-Jer Wu have decided to resign as Associate Editors. We would like to thank them for their efforts and service to the journal in these past few years. The Editorial Team is delighted to welcome new Associate Editors, Drs. Roland Kirschner (School of Forestry and Resources Conservation, National Taiwan University), En-Cheng Yang (Department of Entomology, National Taiwan University), Yiching Lin (Center for Ecology and Environment, Tunghai University) and Pei-Jen Lee Shaner (School of Life Science, National Taiwan Normal University) to the editorial team. The scientific theme underlying these appointments is one that we are actively developing in the journal to include more research fields in fungi, insects and ecology. We will also seek to expand our editorial board membership for addressing the gaps in biodiversity researches and further enriching this journal.

Taiwania is a peer-reviewed, open-access on-line and print journal devoted to publishing research papers in all fields of biodiversity and conservation. The aim of this journal is to provide a platform for all the researchers, scientists, doctors, students to update with the latest advancements and new discoveries in biodiversity.

Finally, the Editorial Team gratefully acknowledges financial support from the National Taiwan University. We would like to thank the Ministry of Science and Technology, for extra funding support. Special thanks also to Ms. Chia-ling Lu and Mr. Po-Yu Lin for website maintenance and security.

Chang-Fu Hsieh & Wen-Yuan Kao
Editor-in-Chief
Taiwania Editorial Office
