From the Editorial Office

Taiwania is a peer-reviewed, open access, online and print journal covering all aspects of biodiversity and conservation. The aim of this journal is to provide a platform for researchers, scientists, doctors and students all over the world to update with the latest advancements and new discoveries in biodiversity. With a new cover form designed by Ms. Li, Yu-Hsiao, this year we published 70 articles including 48 articles on taxonomy, 5 articles on morphology, 2 articles on cell biology and physiology, 6 articles on genetics, molecular and developmental biology, and 9 articles on ecology, evolutionary biology and animal Behavior. We would like to thank all of our contributing authors for their wonderful works and choosing *Taiwania* as their publication venue. We are also grateful to the more than 266 individual reviewers for their invaluable dedication and support over the last year. Finally, the Editorial Team gratefully acknowledges the financial support from the National Taiwan University, and extra grant funded by the Ministry of Science and Technology (MOST 110-2312-B-A22-001), Taiwan.
