Cover Photo: In 2011, Mr. Li-Hsien "Reckon" Yang discovered and photographed a distinctive orchid species in a cloud forest of Pingtung County, Taiwan. It is now confirmed as a new species of *Liparis* and named as *L. reckoniana* in honor of his great observation. Its wild population should be immediately and strictly protected since less than ten individuals have been found so far. Photographed by Li-Hsien Yang.
