**Taiwania** is issued quarterly, in March, June, September, and December, with one volume per year. Papers are published in English with a Chinese abstract.

**Taiwania** is open for papers on all aspects of life sciences. The privilege of publication in the journal is not restricted to members of the institute; contributions from worldwide researchers are welcome. Papers submitted to this journal must be original and have not been published elsewhere. **Instructions to Authors** are notified in the following page. Copies can be obtained from the **Editorial Office, College of Life Science, National Taiwan University, No. 1, Section 4, Roosevelt Road, Taipei 106, Taiwan**. **Taiwania** is available online from the website (<http://tai2.ntu.edu.tw/taiwania> or <http://www.press.ntu.edu.tw>) of National Taiwan University since 1988 as well as in the print edition. **Taiwania** is covered by major abstracting and indexing services, such as Biosis, CAB Abstracts et al.

**Cover Photo:** New species - *Rohdea dracaenoides* (Asparagaceae) was discovered recently in central Laos (Vientiane Province) during international expedition of U.S.A. National Geographic Society under leadership of Prof. Leonid V. Averyanov and Dr. Nguyen Tien Hiep. This plant has rather isolated taxonomical position and its finding essentially expands Sino-Japanese generic distribution in south-west direction. Described species represents ancient local endemism of karstic limestone formations. It grows on exposed vertical cliffs and rocky outcrops as obligate lithophyte of remnant table-like mesas at elevations between 1500 and 1700 m a.s.l. Plant has unusual attractive constitution and may be recommended for cultivation as outdoor ornamental plant in countries of subtropical climate.
