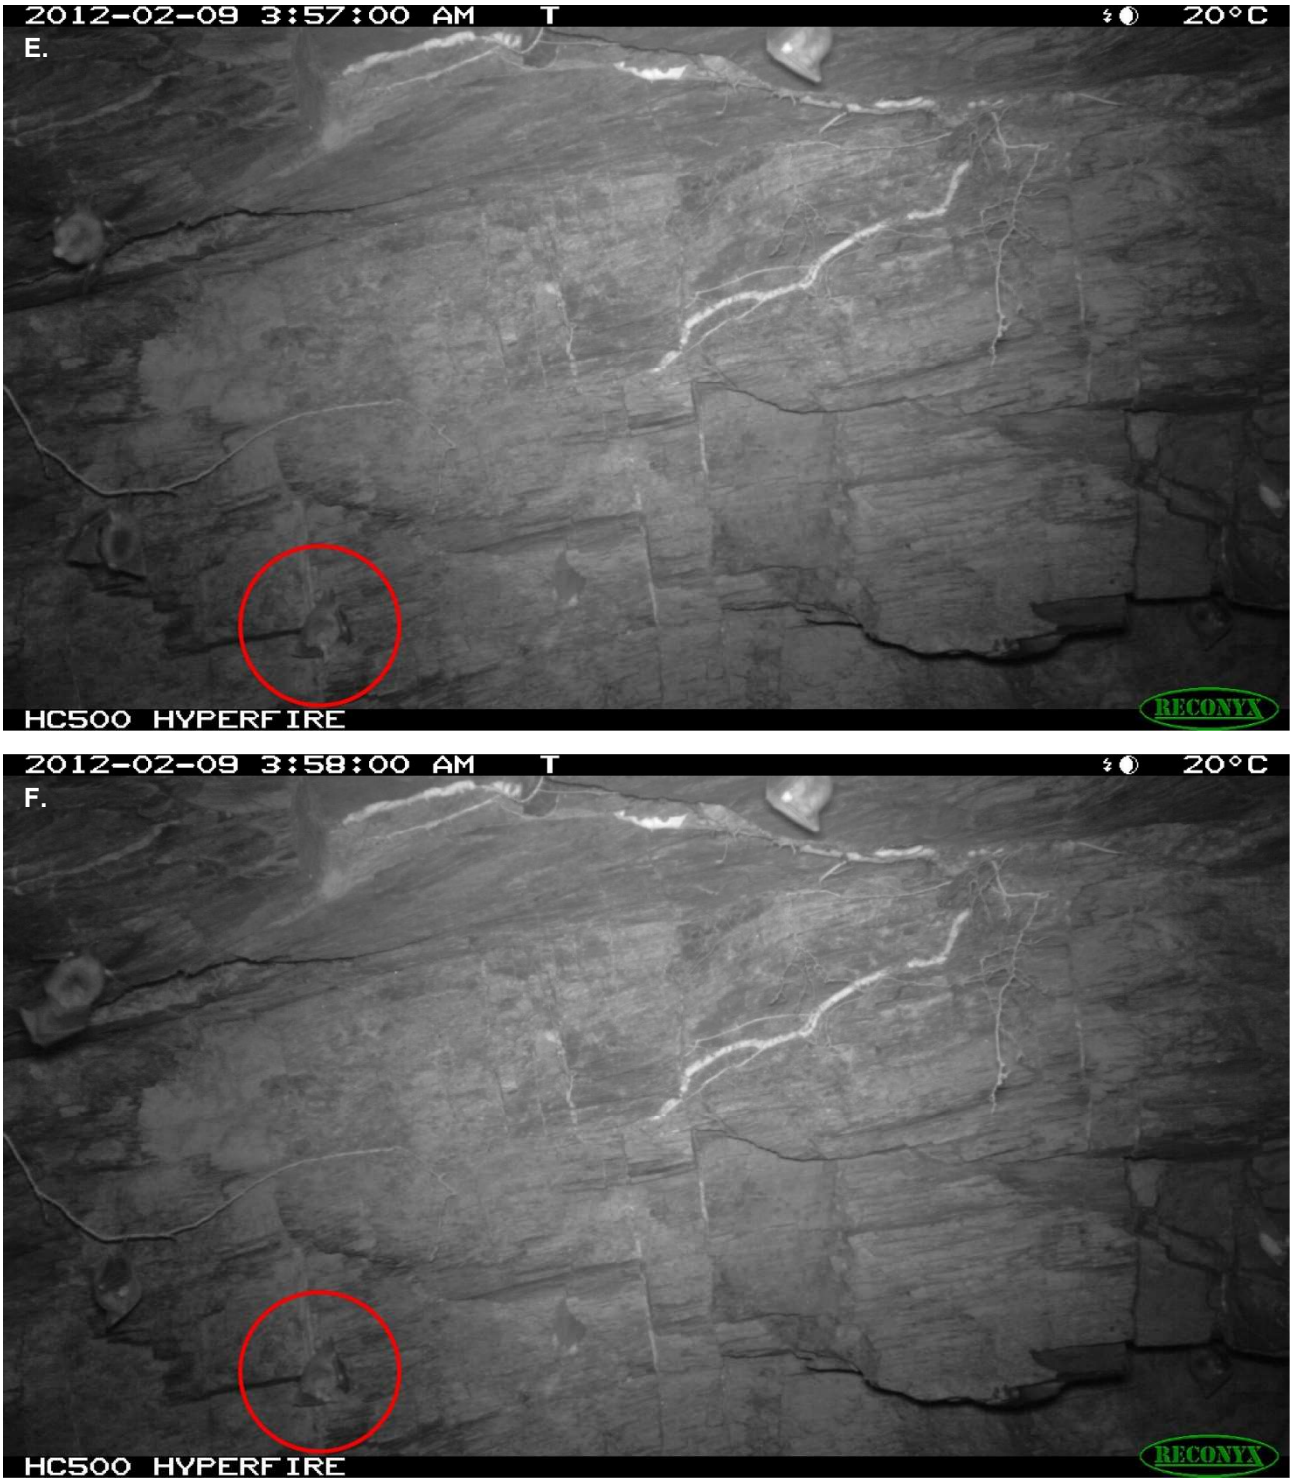

Fig S1. Infrared camera images from the B2 cave showing the Formosan tailless leaf-nosed bat (***Coelops frithii formosanus***) returning to the cave with lepidopteran prey for consumption. (A)–(B), individual 1 (2012/2/8); (C)–(F), individual 2 (2012/2/9). The camera was set to take photographs at 1-minute intervals. Red solid lines indicate the bat's roosting position at that moment, while the red dashed line in (C) indicates the bat's position before it arrived at the roosting position shown in (D).

Fig. S2. Roosting record of the Formosan tailless leaf-nosed bat (***Coelops frithii formosanus***) within Cave B2.
